

FLAIR

More Comfort, Less Energy

The Perfect Temperature

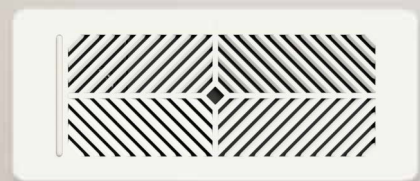

IN EVERY ROOM

Flair Smart Vents

Smart zoning made simple. All your customers have *that* room; the room that's always **too hot or too cold**. They need the living room at 68, and the kid's room needs to be cooler than their bedroom.

They need **room-by-room temperature control**. Flair's Pucks and Smart Vents use advanced machine learning to make this a reality. Fast and easy to install, you can zone a home before lunch!

Pucks and Mini Splits

The Flair Puck makes your mini split **smart**. **Instantly**. Bring WiFi control to over 250 brands of mini splits. It's the smart thermostat for the rest of us.

Give your customers features they want, like **7-day scheduling** and **temperature control** based on the room temperature, not the temperature at the mini split. The Flair Puck also **saves money** by turning off the AC or heat when the family is away. It's the perfect companion to any mini split.

Why Pros Love Flair

2-YEAR PRO INSTALL WARRANTY

Get our standard 1 year warranty, plus another year

for pro purchase and install

Reliable.

Flair Pucks are packed with technology for pro-grade thermostatic control at consumer-friendly prices.

Flair Smart Vents are made of rugged steel, can be powered by battery (2-4 year battery life) or 24VAC, and have extra mounting holes so you'll never have to patch drywall again.

Onboard pressure sensors and Flair's Back Pressure Protect safeguard the health of home HVAC systems.

Flexible.

Flair products work with most HVAC systems including central heating and cooling, and ductless mini splits.

Integrations with ecobee, Honeywell, Amazon Alexa, and Google Assistant mean that every customer, including smart-home enthusiasts, will be happy.

Easy to install.

Installation is as simple as swapping out an old vent, plugging in a Puck, and following the instructions in our App.

We also provide training, easy access to tech support, and manuals if you ever need assistance.

Flair Software

Advanced control at your fingertips.

- Set up room by room **7-day schedules** and adjust individual room temperatures—all from your phone
- Energy-saving **geofencing** turns systems off when customers aren't home
- Sync mini splits with ecobee or Honeywell thermostats - **mirroring and staging** features
- **Instant** and **historical** data for temperature, humidity, ambient light, pressure, and battery levels
- Integrates with Amazon Alexa and Google Assistant for **voice control**
- Compatible with over 250 brands of mini splits, portables, and ACs
