

# THE FOX BOX

UV-C Air Purifier

Connects to an Air Exchanger

ERV - HRV - Inline Fresh Air

## Problem:

“Fresh” outdoor air is un-treated

- Conventional filtration is only effective against particulates, like dust
- Smog, odors, VOC's, mold, pollen, allergens & airborne viruses are left un-treated

## Solution:

Fox Box uses Fresh Aire UV's award winning advanced Lifetime V-Twin EverCarbon™ & UV-C to neutralize odor, toxic VOC's & biological contaminants entering the home
