## Flair Products

Flair products are built for contractors to help their customers improve comfort, reduce energy, and increase efficiency for both ductless and ducted/central systems.

### THE FLAIR PUCK

The Flair Puck is a wireless smart thermostat for ductless units, bringing Wi-Fi based controls to 200+ brands of mini splits. You'll love the easy install and your customers will love best-in-class controls.

### FLAIR SMART VENTS

Flair Smart Vents provide room-by-room zoning and advanced temperature control. Fix a single room from overheating/overcooling, or balance temperatures across multiple rooms.

## Flair Puck for Mini Splits

### EASY TO INSTALL

No wiring, no additional accessories. Instantly make any brand or model smart.

### MORE ACCURATE TEMPERATURE

Reads the temperature on the Flair Puck instead of the head unit.

### INTUITIVE FEATURES

7 Day Scheduling, Auto Home/Away, mode lock, and contractor remote access.

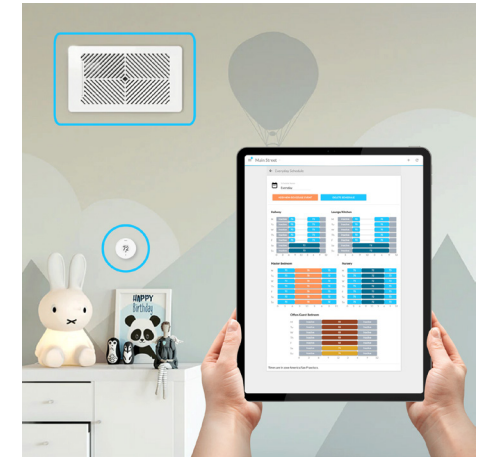

### ADVANCED INTEGRATIONS

Use with central HVAC controlled by ecobee, Honeywell and Nest to provide staged heating or coordinated control. Works with Amazon Alexa and Google/Assistant Hey Google.

### CONTROL FROM ANYWHERE

Customers and contractors can control their Flair Pucks from anywhere with an iOS/Android device.

## Flair Smart Vents

### ZONING MADE SIMPLE

Drop in register replacement with no wiring, drywall or ducting changes. Room-by-room zoning that's affordable and easy to install.

### FLEXIBLE INSTALL OPTIONS

Use batteries (3-4 years) or 24 V to power the Smart Vents.

### ROOM LEVEL CONTROL

Different set points from room to room, 7 Day Scheduling included.

### THE BEST INTEGRATIONS

Integrates with ecobee, Honeywell, Nest, Carrier Infinity, Bryant Evolution, and more. Works with Amazon Alexa and Google/Assistant Hey Google.

### PROTECTION BUILT IN

Onboard pressure sensors and Flair's backpressure protection safeguard the health of the HVAC systems.
