

Dryer Exhaust Product Lineup

Better Dryer Venting

Protect Exhaust Hose Neatly in the Wall

In-wall dryer connection makes homes safer, roomier and more efficient. Laundry appliances can be placed flush to the wall without the risk of crushing the hose or restricting airflow.

DB-3D DB-4D DB-350 DB-425 DB-480

Code Approved for Full Run Length

This code approved, 500% more efficient dryer duct elbow helps overcome length of run issues. Its longer radius (10") and smooth interior reduce friction loss. In fact, UL has proven it to be 500% more efficient than sectioned elbows.

LT90

LT45

Safe, Efficient and Easy to Install

DryerFlex combines the ease of use and flexibility of foil flex with the fire resistance and airflow efficiency of semi-rigid transition hose. Constructed of crush and puncture resistant 100% aluminum, it is UL2158A Class 0 Listed and maintains a 4" diameter at all lengths.

DFLX4 — 4' Extended
DFLX8 — 8' Extended
DFLX25 — 25' Extended

Zero Back Pressure Dryer Roof Vent

Featuring curved dampers and free-flowing ports, these sturdy, protected, Galvalume terminations are the most airflow efficient dryer roof vents available.

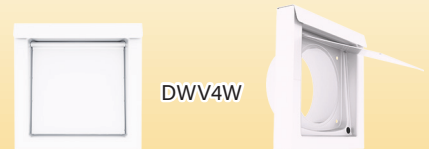

DJK477

DJK486

Efficient, Low Profile Wall Vent

This stylish and durable enclosure handily addresses all code requirements for safe dryer venting. Heavy gauge galvanized steel construction with powder coating ensures a long duty life.

DWV4W

6WVW

6 Premium Inch Wall Vent

Efficient, Low Profile Kitchen & Bath Wall Vent

Manufactured to the exacting specifications of the DryerWallVent, the 6-inch Premium Wall Vent keeps a consistent look for the entire home. Heavy gauge galvanized steel construction with powder coating ensures a long duty life.
